

APRIL 2, 2015 4TH

STARTER

Find x.

①

②

$$(x+5) + 40 = 90$$

$$x + 45 = 90$$
$$-45 \quad -45$$

$$x = 45^\circ$$

③

$$2x + 60 = 180$$

$$-60 \quad -60$$

$$2x = 120$$
$$\frac{2x}{2} = \frac{120}{2}$$

$$x = 60^\circ$$

4/2 Triangles

New vocabulary word: **TRIANGLE**

3-sided polygon

With your partner, name as many types of triangles as you can! Be prepared to describe them too.

Acute

Obtuse

Right

Scalene

Equilateral

Equiangular

Isosceles

Classifying Triangles Using Angles

acute
triangle

all acute angles

obtuse
triangle

1 obtuse angle

right
triangle

1 right angle

equiangular
triangle

3 congruent angles

Classifying Triangles Using Sides

Congruent sides have the same length.

scalene triangle

no congruent sides

isosceles triangle

at least 2 congruent sides

equilateral triangle

3 congruent sides

Classify the triangle.

1.

Right
Isosceles

2.

Right
Scalene

3.

Isosceles
Acute

4.

Obtuse
Isosceles

Key Idea

Sum of the Angle Measures of a Triangle

Words The sum of the angle measures of a triangle is 180° .

Algebra $x + y + z = 180$

Find the value of x . Then classify the triangle.

$\frac{7}{5} / \frac{27}{8}$

$$x + 78 + 27 = 180$$

$$x + 105 = 180$$

$$x = 75$$

$$x + 53 + 37 = 180$$

$$x + 90 = 180$$

$$x = 90$$

$$x + 60 + 60 = 180$$

$$x + 120 = 180$$

$$x = 60$$

Can you create a triangle using the given combination of these colored segments?

The smaller 2 sides have to add up be more than the longest side

red green purple

No!

blue red purple

No! blue green red

blue green purple

Tell whether a triangle can have the given angle measures. If not, change the first angle measure so that the angle measures form a triangle.

$25^\circ, 64^\circ, 91^\circ$

$$\begin{array}{r} 25 \\ +64 \\ \hline 91 \\ \hline 180 \end{array}$$

Yes

$85^\circ, 64^\circ, 30^\circ$

$$\begin{array}{r} \cancel{85} + 1 \quad (86) \\ 64 \\ + 30 \\ \hline 179 \\ + 1 \\ \hline 180 \end{array}$$

$33^\circ, 140^\circ, 12^\circ$

$$\begin{array}{r} 33 - 5 \quad (28) \\ 140 \\ + 12 \\ \hline 185 \\ - 5 \\ \hline 180 \end{array}$$
