

Solving Multi-Step Equations

Solve each by showing ALL of your work as you were taught in class this year.

1. $-17 = 3k - 5$

2. $9 + \frac{c}{-4} = 12$

3. $-18 = -4(2d - 3)$

4. $3(5 - 2x) - 4 = 25$

5. $3(2 - 4n) - 2(n + 5) = 24$
